

JSAO 2024

Greetings

Dear Colleagues,

It is our honor to organize the 62nd Annual Meeting of the Japanese Society for Artificial Organs (JSAO 2024) on November 14-16, 2024, at the Light Cube Utsunomiya, Tochigi, Japan.

We extend our warmest invitation to you to join this exciting conference, which will be held as a Joint Meeting with the 30th Annual Meeting of the International Society for Mechanical Circulatory Support (ISMCS 2024) on November 13-15, 2024.

The 62nd JSAO annual meeting will deliver a stimulating program featuring leaders who will present the latest clinical results and innovative research and development covering a wide range of important disciplines regarding Artificial Organs.

The theme of the Joint Meeting is "One Team for the Artificial Organ in the Future." We would like to discuss the current status and issues by inviting people from various fields related to artificial organs, such as physicians, medical professionals other than physicians, artificial organ developers, researchers, and government officials, to take a step toward a future society of artificial organs.

The Tochigi area, including Utsunomiya, has the World Heritage Sites of Nikko, a national park with Kegon Falls, and Lake Chuzenji, as well as many hot springs in the area. November is also the season of beautiful autumn leaves.

We anticipate the pleasure of welcoming you in Utsunomiya, Tochigi, Japan.

Greetings

Dear Colleagues,

We are pleased to announce that the 30th Annual Meeting of the International Society for Mechanical Circulatory Support (ISMCS 2024) will be held over the three days from Wednesday, November 13 to Friday, November 15, 2024 at the Light Cube Utsunomiya in conjunction with The 62nd Annual Meeting of the Japanese Society for Artificial Organs (JSAO 2024). We have chosen "Reunion for clinicians and engineers" as the theme of the meeting. We encourage physicians, surgeons, engineers, and researchers from all over the world to reunite in Utsunomiya and enjoy the face to face discussion which was impossible during the Covid-19 pandemic. During the pandemic we have not seen much innovation in the field of MCS. In this congress we will invite international speakers from all over the world, who will share their first-hand experience and their cutting-edge research.

Utsunomiya is located at north of Tokyo and it takes 50 min by bullet train (Shinkansen) from Tokyo. Utsunomiya is famous for its beautiful scenery in autumn especially in Nikko area such as Toshogu shrine (magnificent memorial for Tokugawa-shogunate, UNESCO World Heritage), Chuzenji Lake, and Kegon Falls (please see the beautiful hotel at Chuzenji Lake). The venue will also offer local foods such as gyoza (pan fried dumplings), ramen, and strawberry.

We hope you will take this opportunity both to engage in lively discussions at the meeting and to step out and enjoy Utsunomiya. All of us are making every effort to make the meetings successful, and we are grateful for your support.
